

TwinCrest Group

"Bringing specialty physicians together with pathologists for financial opportunities"

Do You Realize That You May Have Given Away A \$1 Million/Year!*

Better Medicine

Pathology Consults

Specimen Control

New Revenues

No Additional Work

1- Is your reimbursement less than it was last year? It is likely going down again!

2- *What has your local pathologist done lately to help you cope financially?*

3- What ancillary service provides the highest return with lowest investment?

Of all ancillary services (ASC, imaging center, CAT scan, etc), the in-office pathology mini-laboratory is the easiest to do, lowest investment and the highest return. There are over 105,000+ in-office physician laboratories, including pathology mini-laboratories. *These are not "pod or condo" labs.*

Using the 2006 Medicare fee schedule for tissue biopsy, our estimate is that each member of your group can *net* over \$50,000/partner/year without doing extra work. You get paid instead of your current pathology laboratory.

You can provide a higher standard of care, have on-site pathology consultations, ultimate specimen control, and have a new revenue stream.

We are the experts in designing, installing, staffing, and billing high quality, state of the art, pathology mini-laboratories. We have over 100+ years of cumulative pathology business experience. Don't trust this to amateurs!

We can design, build, equip, and staff your quality pathology mini-laboratory in approximately 90 days. You continue seeing patients and doing procedures. We do everything to launch your pathology laboratory successfully.

Please visit our new web site at www.twincrestgroup.com for more information. We can arrange a site visit to one of our operating facilities.

**Average estimated profits from a 4 physician practice with our pathology mini-laboratory. Your actual results may be higher or lower depending on the size and volume of your practice.*
